

BEVAE-181 Environmental Studies

English Previous-Year Questions with Correct Answers

December 2020–December 2025

December 2020

1. In which of the following reports/books was 'Sustainable Development' formally defined for the first time ?

Answer (3): Our Common Future

2. Which one of the following is not one of the seventeen Sustainable Development Goals adopted by UN ?

Answer (4): Tourism and Travel

3. Which one of the following is an example of human modified environment ?

Answer (2): Orchards

4. In which of the following do forests not play a significant role ?

Answer (3): Regeneration of carbon dioxide

5. Which one of the following regions covers more than 50% plant species in the world ?

Answer (1): Tropical Rain Forests

6. Crown fire mostly takes place in which of the following forests ?

Answer (1): Dense Forest

7. Communities residing near waste disposal sites receiving less economic benefits than the communities generating the waste represents

Answer (2): Social Inequity

8. Which one of the following communities does not have a strong sense of stewardship ?

Answer (1): Urban community

9. Which of the following views considers nature as a mother and that she cannot be tamed ?

Answer (2): Indian view

10. The water cycle is driven by

Answer (2): Sun

11. Chemosynthetic bacteria are

Answer (3): Autotrophs

12. Life does not exist beyond _____ metres above mean sea level.

Answer (4): 9000

13. In an ecosystem, the decomposition of organisms takes place by

Answer (2): reducers

14. The increase in population between 10,000 BC and about 1800 AD coincided with the

Answer (1): growth in agriculture

15. During the 14th century more than half the population of Europe and Asia was killed due to

Answer (1): bubonic plague

16. Which one of the following is not a genetic disease ?

Answer (3): Malaria

17. Match the types of environmental influences with their respective category. Environmental Influence Category (a) Poison (i) Physical (b) Noise (ii) Sociological (c) Overcrowding (iii) Biological (d) Allergens (iv) Chemical

Answer (2): a – iv, b – i, c – ii, d – iii

18. In a coniferous forest, the soil is

Answer (2): acidic and mineral deficient

19. The organisms which are attached to stems and leaves of rooted plants are known as

Answer (3): periphyton

20. In an ocean, the zone showing the maximum variability in terms of temperature, light, salinity and moisture is

Answer (1): littoral zone

21. An estuary is a transitional zone representing

Answer (4): unique ecological features and biotic communities

22. Which of the following is a major cause of deforestation ?

Answer (1): Forest fires

23. Passenger pigeon is the perfect example of loss of species due to

Answer (4): selective destruction for food

24. The weed which causes enormous damage in fish and rice crop is

Answer (1): Water hyacinth

25. Artificial insemination has been useful for conservation of

Answer (3): elephants

26. Which one of the following is not a major characteristic feature of biodiversity hotspot ?

Answer (4): Large number of exotic species

27. Which one of the following areas in India is a hotspot of biodiversity ?

Answer (2): Western Ghats

28. Which one of the following has the maximum genetic diversity in India ?

Answer (3): Mango

29. Which of the following has maximum percentage of availability of water ?

Answer (4): Ground water

30. Among the ecosystems mentioned below, where can one find maximum biodiversity ?

Answer (1): Mangroves

31. How much water on the Earth is readily accessible for human use ?

Answer (2): 1%

32. The soil which is low in organic matter and has low fertility in India is

Answer (3): Soil of desert region

33. Which of the following is not a practice used to prevent soil erosion ?

Answer (2): Kul

34. Identify the conventional source of energy from the following :

Answer (4): Atomic energy

35. A biomass gassifier converts

Answer (1): solid fuel to gaseous fuel

36. The most suitable fuel for a fuel cell is

Answer (3): Hydrogen

37. The biophysical carrying capacity is _____ population that can be supported by the resources of the planet at a given level of technology.

Answer (2): the maximum

38. Which of the following is not a green house gas ?

Answer (4): Chlorine

39. Which of the following is not related to climate change ?

Answer (4): Montreal Protocol

40. The ozone layer is present in which of the following ranges of the atmosphere ?

Answer (2): 15 – 50 km

41. The pH of rainfall was measured to be as per the following at four places A, B, C and D. Which place had the acid deposition ?

Answer (2): B – 6.2

42. Which of the following chemicals is responsible for ozone depletion ?

Answer (3): Chlorofluorocarbons

43. Which of the following animals excretes very concentrated urine ?

Answer (3): Nocturnal Rodents

44. Which of the following is an example of non-point source of pollution ?

Answer (1): Run-offs from agricultural fields

45. When was The Air (Prevention and Control of Pollution) Act enacted ?

Answer (3): 1981

46. The main objective of UNFCCC relates to

Answer (1): Green house gases

47. Which is not a waste minimisation method ?

Answer (4): Landfill

48. Which is the best method for disposal of hospital and toxic wastes ?

Answer (1): Incineration

49. Which method is commonly used to assess the presence of organisms in a water body ?

Answer (1): MPN

50. NBA has been set up under the

Answer (3): The Biological Diversity Act

December 2021

1. Which one of the following is an example of man-made environment ?

Answer (3): Crop fields

2. Who coined the term 'Possibilism' ?

Answer (1): Lucien Febvre

3. Which one of the following is not one of the seventeen Sustainable Development Goals ?

Answer (2): Life on air

4. Holding meeting in a remote location to minimise public participation is an example of _____.

Answer (3): Social inequity

5. Which of the following views towards nature was proposed as an alternative to patriarchal system of domination ?

Answer (2): Ecocentrism

6. The main centre of ENVIS is located at :

Answer (2): Delhi

7. Primary Consumers are :

Answer (1): Herbivores

8. The following components — sulphates in water, acid rain and fossil fuel are part of the :

Answer (4): sedimentary cycle

9. In ecological succession, the final stage is termed as :

Answer (1): climax community

10. In an ecosystem, energy is lost in the form of :

Answer (3): chemical energy

11. At global level the region most prone to natural calamities is :

Answer (2): Asia

12. Among the following factories, which is not in the "Taj Trapezium Zone" ?

Answer (3): Mathura Sugar Factory

13. Silent Valley is the narrow valley of the _____ river.

Answer (2): Kunthi

14. The world population around 800 BC was approximately :

Answer (3): 5 million

15. The temperate deciduous forests have :

Answer (4): Trees of 40 – 50 metres height with thin and broad leaves

16. In India, Teak and Bamboo are common in :

Answer (1): tropical seasonal forests

17. In Indian grassland ecosystem, the biomass peaks in the period between :

Answer (3): September to October

18. An example of lotic freshwater ecosystem is :

Answer (2): pool

19. Insecticides, particularly DDT, led to the reduction of population of :

Answer (4): birds

20. Steady rehabilitation of the Great Indian Rhinoceros was hampered because :

Answer (3): of the rinderpest disease

21. The problem of invasive species is likely to increase due to :

Answer (1): climate change

22. Alien species which is known to cause skin allergies is :

Answer (3): Parthenium hysterophorus

23. Which one of the following is not a criterion for designation of biodiversity hotspots ?

Answer (4): Lesser interspecific competition

24. Biodiversity of a geographical region represents :

Answer (1): genetic diversity present in the dominant species of the region

25. Which one of the following animals is found only in Western Ghats ?

Answer (1): Barking Deer

26. The main source of water for lakes and rivers is :

Answer (2): runoff

27. Which of the following is not true for red soil ?

Answer (1): It supports rainforests and grasslands.

28. An 'aquifer' is :

Answer (2): a layer of rock through which water percolates down.

29. The most effective treatment of alkaline soil is to apply :

Answer (4): gypsum

30. From which of the following types of sources can energy be harnessed using photovoltaic cell ?

Answer (3): Sun

31. The first wave/tidal energy plant was established in India at :

Answer (2): Thiruvananthapuram

32. The largest coal producing country in the world is :

Answer (3): China

33. The maximum population that can be supported by the resources of the planet at a given level of technology :

Answer (1): is the biophysical capacity.

34. Among the following, which one is the major contributor to greenhouse effect ?

Answer (4): Water vapour

35. Which of the following statements is correct for Ultra Violet (UV) radiation ?

Answer (2): UV B is absorbed by the ozone layer.

36. Which one of the following can cause skin cancer and cataract in humans ?

Answer (2): UV radiation

37. Which one of the following is a secondary pollutant ?

Answer (4): Sulphur dioxide

38. The standard level of RSPM is :

Answer (1): 60 micrograms per cubic metre

39. The Kyoto Protocol deals with which environmental issue ?

Answer (2): Biological diversity

40. Hotspots are regions of high :

Answer (3): critically endangered population

41. What is the main aim of the 1987 Amendment of the Air (Prevention and Control of Pollution) Act, 1981 ?

Answer (1): To enable an integrated approach to environmental problems

42. The Forest (Conservation) Act was enacted in the year :

Answer (4): 1986

43. Which convention took up the protection of ozone layer ?

Answer (1): Vienna Convention

44. Which one of the following is generally not a recyclable waste ?

Answer (3): Medical waste

45. Which one of the following is not a method of waste minimisation ?

Answer (2): Waste concentration

46. Which one of the following is not a method of disposal of hazardous waste ?

Answer (3): Dumping at sea

47. Which one of the following is not correct in the

context of biodiversity in India ?

Answer (1): India has 6 biodiversity hotspots.

48. Which one of the following does not represent ecological significance of forest ?

Answer (4): Providing aesthetic and spiritual value

49. Which one of the following is not included in the category of Non-Timber Forest Product ?

Answer (3): Animal hides and bones

50. Joint Forest Management was firstly implemented in the State of :

Answer (2): West Bengal

June 2022

1. World Commission on Environment and Development was chaired by :

Answer (2): Gro Harlem Brundtland

2. Which one of the following is a decomposer ?

Answer (4): Fungi

3. Which one of the following is not one of the priority areas for achieving sustainable development goals ?

Answer (3): Zero pollution

4. The main sulphur reservoir in the sulphur cycle is present in the :

Answer (1): soil

5. Level IV of the trophic level could be occupied by :

Answer (4): tiger

6. In the biosphere, the main land component is known as :

Answer (1): lithosphere

7. Identify the following types of food chain : Goat -> Nematodes -> Saprotrophic bacteria

Answer (3): parasitic food chain

8. The discipline of public health was established in Europe after :

Answer (4): 1842

9. The occurrence of may take place when sea water in the tropical belt gets heated above 27°C and low pressure areas developed above the water levels.

Answer (2): cyclones

10. Floods in which two countries results in two-third of total deaths caused by floods :

Answer (1): India and Bangladesh

11. The natural defence against tsunamis is :

Answer (1): mangrove forest

12. In MAB programme run by UNESCO, MAB stands for :

Answer (3): Man and the Biosphere

13. Seed bank is the example of :

Answer (1): ex-situ conservation

14. A wide diversity in species composition indicates that ecosystem is :

Answer (1): likely to be more stable in the long-term

15. The fostering technique has been used to conserve :

Answer (3): Whooping crane

16. The unattached organisms in an aquatic ecosystem which live at the interface of air-water are known as :

Answer (1): neuston

17. Brackish water ecosystems include :

Answer (4): estuaries and mangroves

18. The average salinity in sea water is about :

Answer (2): 3.5%

19. Which of the following is open or heterotrophic system ?

Answer (3): River

20. Approximately 50% of the total world species are present in :

Answer (1): tropical rain forests

21. Genetic diversity is related to :

Answer (3): diversity in number and type of genes

22. Biodiversity hotspots are regions of high :

Answer (2): endemism

23. Which one of the following statements about biodiversity is not true ?

Answer (2): Islands and coastal stretches of India show high number of endemic species.

24. Ravine is formed due to :

Answer (3): soil erosion

25. Finer particles in waste water can be made to settle by using :

Answer (3): Caustic soda

26. What percentage of global freshwater is available in the liquid form ?

Answer (4): 20

27. Which of the following is not achieved by addition of manure ?

Answer (3): Decrease in soil salinity

28. Which of the following sources of energy is non-conventional ?

Answer (2): Biomass

29. Which of the following regions in India is the highest producer of mineral oil ?

Answer (4): Bombay High

30. Economic development leads to declining growth rates of per capita energy demand in which of the following ?

Answer (4): Commercial sector

31. 'Sludge gas' largely consists of :

Answer (4): methane

32. Intergovernmental Panel on Climate Change (IPCC) was established in :

Answer (3): 1988

33. Which one of the following is not responsible for acid rain ?

Answer (4): CFCs

34. Which one of the following is not a part of Eight National Missions for climate change ?

Answer (3): National Mission for Hunger and Poverty Eradication

35. Basel convention is largely related to :

Answer (2): hazardous waste management

36. The main function of National Green Tribunal is :

Answer (1): effective and expeditious disposal of cases on environmental issues.

37. The Air (Prevention and Control of Pollution) Act was amended in :

Answer (2): 1987

38. Which toxic gas was released from chemical plant during Bhopal Gas Tragedy ?

Answer (3): Methyl isocyanate

39. Which one of the following is a primary pollutant ?

Answer (2): Sulphur dioxide

40. Which one of the following is responsible for depletion of oxygen in water causing harm to aquatic life ?

Answer (3): Pesticides

41. What would be the best method for disposal of radioactive nuclear waste ?

Answer (2): Underground disposal

42. Which one of the following is not a biological method of waste treatment ?

Answer (4): Lagooning and tank storage

43. Which of the following is not a factor requiring new set of ethics for the environment ?

Answer (1): Changing food habits

44. Which one of the following statements related to economic significance of forest is not correct ?

Answer (4): Fruits, leaves, roots and tubers of the plants form the food of forest tribes.

45. Which one of the following is not one of the causes of deforestation ?

Answer (4): Rise in carbon dioxide in the atmosphere

46. India needs about percentage of its total area under forest to meet the ecological and economic needs.

Answer (4): 33

47. Which of the following animals excretes very concentrated urine ?

Answer (1): Camel

48. The attitude which assigns significantly greater value to human beings than any other non-human organisms is known as :

Answer (2): Anthropocentrism

49. Which one of the following is not an ENVIS Centre ?

Answer (2): Tata Institute of Fundamental Research, Mumbai

50. MPN test is used to detect :

Answer (1): E. coli

December 2022

1. Who developed the concept of determinism ?

Answer (1): Friedrich Ratzel

2. Which of the following is not one of the seventeen Sustainable Development Goals ?

Answer (1): Climate Action

3. Which one of the following is a human modified environment ?

Answer (2): Sanctuaries

4. Which one of the following refers to a position in the food chain ?

Answer (3): Trophic level

5. In the biosphere water component is known as :

Answer (4): Hydrosphere

6. Sulphur cycle is an example of :

Answer (3): both gaseous and sedimentary cycle

7. Secondary consumers are :

Answer (3): carnivores

8. In coniferous forest the soil is :

Answer (1): acidic and mineral deficient

9. Chameleons, agamids and geckos are found in :

Answer (1): temperate rainforest

10. Which one of the following species excretes very concentrated urine and does not use water for temperature regulation and can live in the desert without drinking water ?

Answer (2): Nocturnal rodent

11. Unattached aquatic organism which lives at the air-water interface is known as :

Answer (3): Neuston

12. What is the percentage of fresh water where global distribution of water resources is considered ?

Answer (1): Less than 3%

13. Which one of the following is a non-renewable resource ?

Answer (3): Mineral deposits

14. The average salinity of sea water is :

Answer (2): 3.5%

15. Which of the following is not achieved by addition of manure ?

Answer (3): Increase in water retentive capacity

16. Which one of the following is not a part of supporting ecological systems and processes function of forest ?

Answer (4): Acts as a carbon sink

17. Which one of the following is a consequence of deforestation ?

Answer (2): Increase in the oxygen liberated by plants

18. Which one of the following is not a Non-Timber Forest Product (NTFP) ?

Answer (2): Edible leaves and flowers

19. Which one of the following statements about the biodiversity in India is correct ?

Answer (4): Conversion of biodiversity is just a fad push.

20. An ecosystem with higher diversity will be :

Answer (2): more fragile and sensitive

21. Which of the following animals are exclusively found in Brahmaputra Valley ?

Answer (2): Rhinoceros

22. Which of the following is not a biodiversity hotspot ?

Answer (4): Vindhya and Satpura region of Madhya Pradesh

23. What percentage of energy needs of India are met by the natural gas ?

Answer (1): About 7%

24. Sludge gas largely consists of :

Answer (3): methane

25. Which one of the following is not a non-conventional source of energy ?

Answer (1): Fossil fuel

26. Which of the following is not an adverse effect of the construction of major dams in India ?

Answer (4): Increase in the groundwater level of the

surrounding region

27. Fostering is a useful technique for conservation which has been found successful in :

Answer (1): Whooping crane

28. Mangroves in the coastal areas work against erosion by acting as :

Answer (3): natural bulwark

29. Which of the following is not an invasive species in India ?

Answer (4): Neem tree

30. Buffer zone plays a significant role in the preserved areas. Which one of the following is not an important function of the buffer zone ?

Answer (4): Hunting is permitted in this zone.

31. The size of Respirable Suspended Particulate Matter (RSPM) is :

Answer (2): 10 – 20 mm

32. _____ is the phenomenon of increase in the concentration of pollutants from one link in a food chain to another.

Answer (3): Bioconcentration

33. Which one of the following is a primary pollutant ?

Answer (3): Carbon dioxide

34. High level of BOD indicates :

Answer (3): increasing levels of dissolved oxygen in water

35. Underground disposal is preferred for the disposal of :

Answer (2): radioactive nuclear wastes

36. Read the below given statements about the single-use plastics and choose the correct options. (i) They clog drains. (ii) They harm animals. (iii) They cause floods in cities. (iv) They can degrade easily.

Answer (2): (i), (ii) and (iv) are correct

37. Eutrophication in water bodies is caused by :

Answer (1): phosphates and nitrates

38. Which of the following is not true for Chlorofluorocarbons (CFCs) ?

Answer (4): They are unaffected by UV radiation in upper atmosphere.

39. Which one of the following is used to measure the concentration of ozone ?

Answer (3): Dobson

40. What is the approximate percentage of solar radiation which is absorbed by the atmospheric gases ?

Answer (2): 20%

41. The provision for environmental protection in our Constitution was made in the year :

Answer (2): 1974

42. When was the Wildlife Protection Act enacted ?

Answer (4): 1972

43. Which one of the following is not one of seventeen categories of polluting industries identified by the Central Pollution Control Board ?

Answer (3): Food processing

44. Projected world population by 2100 would be :

Answer (1): 11.2 billion

45. Match the following : Environmental Influence Cate-

gory (a) Stress (i) Physical (b) Toxins (ii) Psychological (c) Noise (iii) Biological (d) Allergens (iv) Chemical

Answer (2): (a)–(ii), (b)–(iv), (c)–(i), (d)–(iii)

46. Which one of the following areas in India does not fall under seismic zone ?

Answer (4): Bundelkhand region of Uttar Pradesh and Madhya Pradesh

47. Chandi Prasad Bhatt was associated with :

Answer (3): Chipko Movement

48. The teaching that all living organisms have values and rights regardless of whether they are useful or not refers to :

Answer (1): Biocentrism

49. Using English only material for communication to non-English speaking communities is an example of :

Answer (3): procedural inequity

50. Which one of the following is not an ENVIS Centre ?

Answer (3): Tata Institute of Fundamental Research (TIFR), Mumbai

June 2023

1. Who was the chairperson of the committee that submitted the report titled “Our Common Future” ?

Answer (3): Gro Harlem Brundtland

2. Which one of the following is not human-made environment ?

Answer (1): Orchards

3. United Nations’ Conference on Environment and Development (UNCED) in 1992 was organised at :

Answer (2): Rio de Janeiro

4. Which one of the following statements related to ecosystem is correct ?

Answer (4): Ecosystem represents enormous contrast in size and complexity.

5. In food chain herbivores represent :

Answer (2): Trophic level II

6. The large reservoir of sulphur on the earth’s surface is :

Answer (1): Soil and sediments

7. Which one of the following is known as the primary community ?

Answer (2): Lichen

8. The predominant predatory bird in desert ecosystem is :

Answer (4): Gyps bengalensis

9. The unattached organism in an aquatic ecosystem which lives at the interface of air-water is known as :

Answer (1): Neuston

10. In ocean zone is shallow and rich in species with high productivity.

Answer (1): Littoral

11. Which one of the following forests has the most diverse communities ?

Answer (3): Tropical rainforest

12. Loss of water in vapour form from the plant is known as :

Answer (4): Transpiration

13. Which one of the following is an economic impact of drought ?

Answer (2): Loss of crop

14. The type of soil found in the Deccan Malwa plateau of Western and Central India is :

Answer (1): Black soil

15. Which one of the following is not a major cause of land degradation ?

Answer (3): Development of watershed

16. Which one of the following statements about the tropical rainforest is not correct ?

Answer (4): The rainforests are only found around Amazon and Nile basin.

17. It has been estimated that India needs percentage area under forest to meet the ecological and economic needs.

Answer (3): 33

18. NTFP stands for :

Answer (2): Non-Timber-based Forest Product

19. Which one of the following diversity is known as the “fundamental currency of diversity” ?

Answer (1): Genetic diversity

20. Which one of the following biogeographic zone covers the largest area in India ?

Answer (2): The Deccan peninsula

21. About two thirds of India’s endemic plants are confined to :

Answer (2): The Himalayas

22. Which one of the following is not true about India as a mega biodiversity country ?

Answer (3): India has 6 hotspots out of 34 global biodiversity hotspots.

23. In India the first wave and tidal energy project was set up at :

Answer (1): Vizhinjam in Kerala

24. Which one of the following sources contributes maximum electricity in India ?

Answer (1): Hydropower

25. Which one of the following sources of energy is used maximum in rural India ?

Answer (4): Biomass

26. Maximum population that can be supported by the resources of the planet at a given level of technology is known as :

Answer (3): Biophysical carrying capacity

27. Which one of the following is an example of selective destruction of species ?

Answer (1): Passenger pigeon

28. Which one of the following is an invasive species in the semi-arid areas of India ?

Answer (1): Golden apple snail

29. Which one of the following is not an ex-situ conservation of biodiversity ?

Answer (1): Seed Bank

30. Match the following : Wetlands States (a) Sunderbans (i) Punjab (b) Harike (ii) Rajasthan (c) Chilka (iii) West Bengal (d) Bharatpur (iv) Odisha Codes :

Answer (3): a-iii, b-i, c-iv, d-ii

31. Which one of the following is a non-point source of pollution ?

Answer (4): Agricultural runoff

32. Which one of the following is not a natural pollutant ?

Answer (3): Smog

33. The full form of TDS stands for :

Answer (2): Total Dissolved Solids

34. Decibel-A (db A) measures :

Answer (1): Pitch of the sound

35. Which one of the following is not a characteristic of hazardous waste ?

Answer (1): Pungent odour

36. Which one of the following is a physical treatment of hazardous waste ?

Answer (2): Lagooning

37. Which one of the following methods is generally used when many industries and urban areas do not have enough vacant space for disposal of wastes ?

Answer (1): Underground disposal

38. The Intergovernmental Panel on Climate Change (IPCC) was established in :

Answer (4): 1988

39. Maximum concentration of ozone is found in :

Answer (2): Stratosphere

40. Which one of the following is not an effect of acid rain ?

Answer (1): Increase in temperature of the earth's surface

41. Earth Summit, 2002 was organised at :

Answer (3): Johannesburg

42. In which of the following cities, one of the zonal branches of National Green Tribunal is located ?

Answer (2): New Delhi

43. Which one of the following Articles in the constitution of India states that "The state shall endeavour to protect and improve the environment and safeguard the forest and wildlife of the country" ?

Answer (2): Article 48 A

44. The major factors responsible for the increase in population between 10,000 B. C. and about 1800 A. D. was largely due to :

Answer (1): Increasing birth rates coincided with the growth of agriculture

45. Which one of the following diseases cannot be regarded entirely as genetic ?

Answer (3): Schizophrenia

46. Match the following : Types Hazards (a) Atmospheric (i) Pest invasions (b) Biological (ii) Landslides (c) Geological (iii) Heat wave (d) Hydrological (iv) Floods
Codes :

Answer (3): a-iii, b-i, c-ii, d-iv

47. Silent valley is located along the river :

Answer (4): Kunthi

48. Which one of the following is not a factor for the creation of new set of environmental ethics ?

Answer (2): Advancement in science and technology

49. Who wrote the essay on "The Land Ethics" ?

Answer (1): Aldo Leopold

50. Which one of the following statements is false ?

Answer (3): Environmental Engineering does not include subjects like civil engineering and architecture.

December 2023

1. The concept of Sustainable Development was formally defined in :

Answer (1): Brundtland Commission Report

2. Moving from pollution intensive economic production to environment friendly processes :

Answer (2): Technological Transition

3. Which one of the following is not one of the Sustainable Development Goals (SDGs) ?

Answer (3): Clean air

4. Decomposers are otherwise known as :

Answer (4): Saprotrophs

5. Which one of the following statements related to ecosystem is false ?

Answer (1): All ecosystems have well defined boundaries.

6. Water component of biosphere is known as :

Answer (3): Hydrosphere

7. In which of the following trophic level quaternary consumers are found ?

Answer (4): Trophic level-V

8. In which type of forest hemlock, yew and maple trees are found ?

Answer (2): Temperate evergreen forest

9. Which one of the following is a predator of desert locust ?

Answer (1): Calotes

10. Organism found living at the bottom of the water mass is known as :

Answer (4): Benthic

11. Which of the following oceanic zone is rich in species and high in productivity ?

Answer (3): Neritic zone

12. Which of the following is a non-renewable resource ?

Answer (4): Minerals

13. The total salt content in fresh water is :

Answer (2): Below 1.5%

14. Which of the following soils is best suited for cotton ?

Answer (2): Black soil

15. Which one of the following is not a soil conservation method ?

Answer (3): Keeping the soil wet

16. Which one of the following is an economic significance of forests ?

Answer (4): Deriving products to be used as insecticides and pesticides

17. Which of the following statements related to forest is not correct ?

Answer (3): It is directly responsible for vector-borne diseases.

18. Deforestation leads to :

Answer (1): increased soil erosion

19. Which one of the following species is highest in number in the biodiversity ?

Answer (4): Insects and micro-organisms

20. Which of the following biogeographic zone covers the largest area in India ?

Answer (3): The Deccan peninsula

21. Which of the following is a biological hotspot in India ?

Answer (2): The Western Ghats

22. Which one of the following is not an indirect use value of biodiversity ?

Answer (2): Bequest value

23. Which one of the following is not a non-conventional source of energy ?

Answer (1): Atomic energy

24. Which of the following areas in India is considered to be suitable for geothermal energy ?

Answer (1): The North-Western Himalaya

25. More than half of the energy need of India is met by :

Answer (2): Coal

26. Urjagram refers to :

Answer (3): Model villages were established to create awareness about judicious use of energy resources.

27. Which of the following is an example of selective destruction ?

Answer (3): Passenger pigeons

28. Which one of the following animals is not a part of commercial hunting ?

Answer (1): Whale

29. Which of the following is not an example of invasive species ?

Answer (3): Sweet pea

30. Which of the following is an example of in-situ conservation ?

Answer (1): National parks

31. Which of the following is a non-point source pollutant ?

Answer (3): Run-offs from agricultural fields

32. Which of the following is not a primary pollutant ?

Answer (4): Sulphuric acid

33. Standard level of RSPM in India is :

Answer (2): 60 microgram per cubic metre

34. Coliform can be detected by conducting :

Answer (1): MPN test

35. Which one of the following is not a waste minimisation method ?

Answer (3): Recycling of waste

36. Which of the following is a biological treatment method of waste ?

Answer (1): Incineration

37. The best way to dispose nuclear waste is :

Answer (1): Incineration

38. Which of the following is not a Green House Gas ?

Answer (3): Sulphur dioxide

39. Which one of the following is not one of the eight missions of National Action Plan on climate change ?

Answer (4): National rural health mission

40. Ozone layer in the atmosphere is generally found in :
Answer (1): Upper layer of the stratosphere

41. The principal bench of National Green Tribunal is located at :

Answer (1): New Delhi

42. Montreal Protocol on Substances that deplete the ozone layer was agreed by nations in :

Answer (2): 1987

43. The Basel Convention is related to :

Answer (4): Climate change

44. Which of the following diseases is not due to genetic influence ?

Answer (1): Haemophilia

45. Match the following and find out the correct alternatives given below : Category Name of the hazard (a) Atmospheric (i) Forest fire (b) Biological (ii) Drought (c) Geological (iii) Heat wave (d) Hydrological (iv) Landslides Codes :

Answer (2): a-iii, b-i, c-iv, d-ii

46. Which of the following region falls under high seismic zones in India ?

Answer (1): Coastal Odisha

47. What could be the population of the world by 2100 ?

Answer (1): 11.2 billion

48. Which of the following is not an ENVIS centre ?

Answer (3): All India Institute of Medical Sciences, New Delhi

49. Which one of the following view towards the nature believes that all organisms on the Earth have values and rights ?

Answer (2): Ecocentrism

50. Using English material to communicate to non-English speaking communities is an example of :

Answer (1): Procedural inequity

June 2024

1. Which one of the following is a natural environment ?

Answer (3): Forest

2. Who developed the concept of 'Determinism' ?

Answer (4): Friedrich Ratzel

3. Which of the following is not one of the seventeen Sustainable Development Goals ?

Answer (1): Climate action

4. Life does not exist beyond metres above mean sea level.

Answer (4): 6000

5. Which one of the following is placed at trophic level V in an aquatic environment ?

Answer (4): Shark

6. The main reservoir of sulphur in the biosphere is :

Answer (1): Soil and sediments

7. In ecological succession, the intermediate community stage is termed as :

Answer (2): Sere

8. Ant eaters, giant flying squirrels, and sloths are found in :

Answer (2): Tropical rain forest

9. An estuary is a transitional zone representing :

Answer (3): Great productivity built on a large base

10. Which biome experiences intense heat and strong wind with a great desiccating action during the months of April and June ?

Answer (3): Desert biome

11. Which of the following aquatic organism is found living at the bottom of the water mass ?

Answer (1): Benthos

12. Which of the following is a renewable resource ?

Answer (3): Forest

13. The process by which solid water changes directly to vapour phase is known as :

Answer (1): Precipitation

14. Which one of the following is not a traditional water management system in India ?

Answer (3): Sprinkler irrigation

15. Which one of the following is not a measure to control soil erosion ?

Answer (3): Removing the bigger trees along the slope

16. Which one of the following is an ecological significance of forest ?

Answer (3): Checks soil erosion.

17. Crown fire takes place in the :

Answer (1): Thorn forest

18. Which of the following enables tribal and other forest dwellers ?

Answer (2): Forest Rights Act, 2006

19. Hotspots are regions of :

Answer (1): high endemism

20. Which of the following has the maximum genetic diversity in India ?

Answer (2): Mango

21. Which one of the following is a use value of biodiversity ?

Answer (4): Aesthetic value

22. Which one of the following statement about biological diversity in India is not correct ?

Answer (2): India has 12 biogeographical regions.

23. Which one of the following is a non-conventional source of energy ?

Answer (3): Wind energy

24. Use of non-conventional sources of energy is :

Answer (3): Both cheap and pollution free

25. The most suitable fuel for a fuel cell is :

Answer (1): hydrogen

26. 'Sludge gas' largely consists of :

Answer (4): Methane

27. Artificial insemination is useful for :

Answer (2): Elephants

28. Fostering as a conservation technique is found successful in :

Answer (1): Whooping crane

29. Mangrove in the coastal area work against erosion by acting as :

Answer (4): Natural recharging aquifers

30. In MAB programme run by UNESCO, MAB stands for :

Answer (1): Man and Biosphere

31. Which one of the following chemical is associated with Bhopal gas tragedy ?

Answer (1): Methyl Isocyanide

32. Which one of the following is a measure of oxygen used by bacteria to decompose the organic matter ?

Answer (3): BOD

33. Which of the following is a biodegradable pollutant ?

Answer (2): Paper

34. Prescribed limit of noise pollution in India is :

Answer (3): 45 dbA

35. Which one of the following is a physical treatment of waste ?

Answer (4): Lagooning

36. Which of the following is the best method of waste minimisation ?

Answer (1): Underground disposal

37. is the phenomenon of increase in the concentration of pollutant from one link in a food chain to another.

Answer (2): Biomagnification

38. The pH value of rainfall of four places A , B, C and D are given below. Identify the place which had the acid deposition :

Answer (1): A-5.5

39. Which day is observed as the "International Day for the preservation of ozone layer" ?

Answer (3): 16th September

40. Which of the following is not true about CFCs ?

Answer (4): They are unaffected by UV radiation in upper atmosphere.

41. The provision for environmental protection in our constitution was in the year :

Answer (4): 1987

42. NBA has been set up under the :

Answer (3): Biodiversity Act

43. Which of the following is not a part of conservation projects of endangered species ?

Answer (2): Camel

44. The study of origin of disease is termed as :

Answer (1): Aetiology

45. Which of the following is a genetic disease ?

Answer (4): Mongolism

46. Which of the following is a geological disaster ?

Answer (3): Landslides

47. Chandi Prasad Bhatt was associated with :

Answer (2): Chipko Movement

48. Which of the following views consider nature as mother and cannot be tamed ?

Answer (1): Indian views

49. Environmental decision that affects certain ethnic groups represents :

Answer (4): Social inequity

50. ENVIS centres are established by :

Answer (3): Ministry of Environment, Forest and Climate Change, Government of India

December 2024

1. Which the following is not one of the seventeen Sustainable Development Goals (SDGs) ?

Answer (4): Gender equity

2. Which one of the following is a human modified environment ?

Answer (3): Orchards

3. Who said that the term 'sustainable development' is an oxymoron ?

Answer (2): Harman Daly

4. Which one of the following is a biotic component ?

Answer (1): Saprotrophs

5. Which one of the following statements is correct ?

Answer (2): Ecosystem represent enormous contrast in size and complexity.

6. Which one of the following is a top carnivore ?

Answer (3): Vulture

7. The main reservoir of sulphur in the biosphere is the :

Answer (4): Sediments

8. Hemlock and maples are found in :

Answer (4): Temperate rain forest

9. On which animal Calotes and Uromastyx are predatory in the Thar desert ?

Answer (2): Desert locust

10. Organisms which remain attached to stems and roots of the rooted plants are :

Answer (1): Periphyton

11. The example of lotic freshwater ecosystem is :

Answer (4): river

12. Which of the following is a non-renewable resource ?

Answer (2): Mineral deposits

13. The soil having low organic matter and have low fertility is :

Answer (1): desert soil

14. The average salinity of sea water is :

Answer (3): 3.5%

15. Ravine land is formed due to :

Answer (4): soil erosion

16. Which of the following regions covers more than 50% plant species in the world ?

Answer (1): Tropical rain forest

17. In which of the following activity forest does not play a significant role ?

Answer (3): Regeneration of carbon dioxide

18. India needs percentages of its area under forest to meet the ecological and economic need.

Answer (2): 33

19. Which one of the following methods of ex-situ conservation provides genetic insurance ?

Answer (4): Seed bank

20. Invasive species which causes skin allergies is :

Answer (3): Congress weed

21. Which one of the following was the first biosphere reserve in India ?

Answer (2): Nilgiri

22. Which one of the following is not considered as fragile habitats ?

Answer (1): Deciduous forest

23. Which one of the following is a biodegradable pollutant ?

Answer (3): Paper

24. Which one of the following is predominantly indoor pollutant ?

Answer (2): Formaldehyde

25. Which one of the following is a photochemical oxidant ?

Answer (4): Ozone

26. Sludge gas largely consists of :

Answer (1): Methane

27. Hot-spots are region of :

Answer (2): high endemism

28. Which one of the following is not correct about India as a mega -biodiversity country ?

Answer (3): India has twelve biogeographic regions.

29. Which one of the following is a non-use value of biodiversity ?

Answer (4): Bequest value

30. Which one of the following has maximum genetic diversity in India ?

Answer (3): Mango

31. A biomass gassifier converts :

Answer (2): solid fuel to gaseous fuel

32. From which one of the following types of sources, energy can be harnessed using photovoltaic cells ?

Answer (1): Sun

33. Which of the following regions in India is the highest producer of oil ?

Answer (4): Bombay High

34. Which one of the following is not a waste minimisation method ?

Answer (2): Landfill

35. Which of the following is not a chemical treatment of waste ?

Answer (3): Conditioning

36. Which one of the following methods is mostly used for disposal of nuclear waste ?

Answer (1): Underground disposal

37. Which one of the following statements related to waste management is true ?

Answer (4): Hospital waste has to be incinerated.

38. Which one of the following is related to climate change ?

Answer (2): Kyoto Protocol

39. The ozone layer is present in which of the following range of the atmosphere ?

Answer (3): 15–50 km

40. Which one of the following can cause skin cancer and cataract in humans ?

Answer (1): Ultraviolet radiation

41. Air (Prevention and Control of Pollution) Act was enacted in the year :

Answer (2): 1981

42. The Principal Bench of National Green Tribunal is situated at :

Answer (2): New Delhi

43. The provision for environmental protection in our

constitution was made in the year :

Answer (4): 1976

44. The study of origin of disease is termed as :

Answer (1): Aetiology

45. Which of the following is not located in the Taj Trapezium ?

Answer (3): Sugar mills of Saharanpur

46. Flooding in two countries namely and result in two-third of the global death count.

Answer (2): India, Bangladesh

47. Silent Valley is the narrow valley of the river.

Answer (4): Kunthi

48. Which one of the following community does not have a strong sense of stewardship ?

Answer (1): Urban Community

49. Holding meeting in a remote area is :

Answer (2): Procedural inequity

50. The main centre of Environmental Information System (ENVIS) is located at :

Answer (3): New Delhi

June 2025

1. Which one the following is a human modified environment ?

Answer (3): Plantations

2. Which one of the following is not one of the seventeen Sustainable Development Goals (SDGs) ?

Answer (4): Social equity and equality

3. Which one of the following is not a decomposer ?

Answer (4): Hawk

4. The extent of the biosphere is about :

Answer (1): 11,000 m below the surface of the earth to 9,000 m above the mean sea level.

5. Primary consumers are found at :

Answer (2): Trophic level II

6. How much percent of water is present on the earth surface in the form of fresh water ?

Answer (2): About 3%

7. Detritus food chain begins :

Answer (3): With decaying organic matter

8. Maple, beech and oak are found in :

Answer (1): Temperate deciduous forest

9. Unattached organisms which live at the air-water interface are known as :

Answer (2): Neuston

10. Which one of the following is not a part of lentic ecosystems ?

Answer (4): River

11. In which of the following process, solid water directly changes into water vapour ?

Answer (3): Sublimation

12. Kul is a traditional irrigation practice in the state of :

Answer (1): Himachal Pradesh

13. Which of the following soil supports cultivation of Rubber ?

Answer (3): Laterite soil

14. Which one of the following is not one of the consequences of excessive irrigation ?

Answer (4): Increase in productivity substantially

15. Which one of the following is an economic significance of forest ?

Answer (2): Forest products used for pharmaceuticals

16. Which one of the following is not a cause of deforestation ?

Answer (3): Selective cutting of the trees

17. In which of the following states was successfully implemented Joint Forest Management ?

Answer (1): West Bengal

18. Which one of the following are the most abundant life forms on the earth in terms of number ?

Answer (4): Insects and Microorganisms

19. The Trans-Himalayas biogeographic region is found in :

Answer (3): Ladakh

20. Which one of the following biogeographic region covers the largest in India ?

Answer (2): The Deccan Peninsula

21. Which one of the following is an indirect use value of biodiversity ?

Answer (1): Aesthetic value

22. Which one of the following is a conventional source of energy ?

Answer (2): Atomic energy

23. The first wave energy project in India was set up at :

Answer (3): Vijninjam

24. India's maximum commercial energy comes from :

Answer (4): Coal

25. Which one of the following is not a factor for the sustainable carrying capacity for the human species ?

Answer (1): Knowledge system

26. Insecticides, particularly chlorinated hydrocarbons reduced the population level of :

Answer (2): Bald Eagle

27. Invasive species which causes skin allergies is :

Answer (3): Congress weed

28. Which one of the following is an in-situ conservation programme ?

Answer (4): National parks

29. Which one of the following wetland is located in Odisha ?

Answer (3): Chilika

30. Which one of the following is a non-point source pollution ?

Answer (2): Run-offs from agricultural fields

31. Which one of the following is a major source of ozone as a pollutant ?

Answer (1): Photochemical reaction

32. Which one of the following is a secondary air pollutant ?

Answer (1): Sulphur trioxide

33. Which one of the following is a physical agent of water pollution ?

Answer (3): Particulates

34. Which one of the following is not a symptom of toxicity ?

Answer (4): Releases ionising radiations

35. Which one of the following is not a biological treatment of waste ?

Answer (1): Conditioning

36. Which of the following is not a part of organic waste ?

Answer (3): Plastics

37. Which one of the following is not a benefit of recycling of waste ?

Answer (4): It does not pollute the environment.

38. Inter-governmental Panel on Climate Change (IPCC) was established in the year :

Answer (4): 1988

39. Ozone is found in :

Answer (2): Stratosphere

40. pH of unpolluted rain water is :

Answer (1): 5.7

41. Which of the following amendments made the protection and improvement of natural environment as Fundamental Duty ?

Answer (2): Forty-second Amendment Act

42. Convention on the Control of Transboundary Movement of Hazardous Wastes and Their Disposal is known as :

Answer (3): The Basel Convention

43. In Delhi, new vehicles should have pollution prevention mechanism comparable to :

Answer (4): BS VI

44. At the dawn of agriculture (about 8000 B. C.) the world population was somewhere around :

Answer (3): 5 million

45. Which one of the following terms is not a part of WHO definition on health ?

Answer (4): Psychological

46. Which one of the following is not a geological hazard ?

Answer (1): Glacier advances

47. In which year Indian coastline experienced the most devastating Tsunami in the recorded history ?

Answer (3): 2004

48. Which one of the following is not one of the three major views on nature ?

Answer (2): The Eastern

49. Which one of the following is not a category of environmental equity ?

Answer (4): Psychological

50. ENVIS centre at TERI works in the area of

Answer (1): Renewable energy and environment

December 2025

1. The title of the Brundtland Commission Report is :

Answer (1): Our Common Future

2. How many goals are there under Sustainable Development Goals ?

Answer (3): 17

3. Who coined the term 'determinism' ?

Answer (2): Fredrich Ratzel

4. Land component of the biosphere is known as :

Answer (2): Lithosphere

5. Chemosynthetic bacteria are :

Answer (1): autotrophs

6. In ecological succession the intermediate community stage is known as :

Answer (4): sere

7. In sulphur cycle, the main sulphur reservoir is present in the :

Answer (3): soil

8. In which type of forest maple, beech and oak are found ?

Answer (2): Temperate deciduous forest

9. The organisms which are attached to stem are :

Answer (1): Periphyton

10. In India, grassland ecosystem biomass peaks in the months of :

Answer (3): July and August

11. Example of lotic ecosystem is :

Answer (2): River

12. The soil which is low in organic matter and fertility is :

Answer (3): Desert soil

13. Which one of the following is NOT a soil conservation practice ?

Answer (1): Kul

14. Finer particles in waste water can be made to settle by using :

Answer (4): Caustic soda

15. Which of the following is NOT achieved by addition of manures ?

Answer (2): Decrease in soil salinity

16. Crown fire takes place in :

Answer (1): Dense forest

17. In which of the following activities forest does NOT play a significant role ?

Answer (3): Regeneration of carbon dioxide

18. Which of the following is an economic significance of forest ?

Answer (4): Deriving products to be used as insecticides and pesticides

19. Which of the following species are highest in number on the earth ?

Answer (2): Insects

20. In which of the following biogeographical region of India, species are known for their extraordinary ecological adaptation ?

Answer (1): The Indian desert

21. *Platacanthomys* and the spinny dormouse are found in :

Answer (3): The Western Ghats

22. Which one of the following facts is NOT correct related to biological hotspots in the world ?

Answer (4): Covers 5% of the earth's surface

23. Which one of the following is a conventional source

of energy ?

Answer (2): Atomic energy

24. The most suitable fuel for a fuel cell is :

Answer (1): Hydrogen

25. The first Tidal Energy Plant in India was established at :

Answer (3): Vizhinjam

26. 'Sludge gas' largely consists of :

Answer (4): Methane

27. Which one of the following invasive species causes skin allergies ?

Answer (2): Congress weed

28. Which one of the following is an example of selective destruction ?

Answer (3): Passenger pigeon

29. Which one of the following animals is NOT a part of commercial hunting ?

Answer (1): Wild ass

30. Which one of the following is an in-situ conservation method ?

Answer (4): National Parks

31. Which one of the following is predominantly an indoor pollutant ?

Answer (2): Radon

32. Which one of the following is a secondary pollutant ?

Answer (4): Ozone

33. The chemical which was responsible for Bhopal Gas Tragedy is :

Answer (1): Methyl Isocyanate

34. MPN test is used to detect :

Answer (3): E. coli

35. Which one of the following is a physical treatment of waste ?

Answer (1): Conditioning

36. Which one of the following is an excellent method of waste minimization, detoxification and disposal ?

Answer (4): Incineration

37. Which one of the following is NOT a technology

used for sludge processing ?

Answer (4): Solidification

38. Which of the following organisations led to the formation of Intergovernmental Panel on Climate Change (IPCC) ?

Answer (3): WMO and UNEP

39. Which of the following is NOT one of the eight missions of the National Action Plan on Climate Change (NAPCC) ?

Answer (1): National Literacy Mission

40. Ozone Day is celebrated on :

Answer (2): 16th September

41. The provisions of environmental protection in the constitution of India were made under

Answer (4): Articles 48A and 51A

42. Which one of the following animals is NOT a part of conservation project for endangered species in India ?

Answer (1): Camel

43. The Kyoto Protocol deals with :

Answer (3): Greenhouse gas emission

44. The study of the cause or origin of diseases is known as :

Answer (2): Aetiology

45. Which one of the following is NOT a geological hazard ?

Answer (4): Heat waves

46. Tsunamis are also known as :

Answer (1): Seismic wave

47. Silent Valley is a narrow valley of the :

Answer (3): Kunti river

48. Which of the following views considers nature as mother and cannot be tamed ?

Answer (2): Indian

49. Holding meetings in the remote location to minimise public participation is a :

Answer (4): Procedural inequity

50. Which one of the following views towards nature were proposed as an alternative of domination ?

Answer (1): Eco-feminism
