

Productivity Notice Board

A practical wall-sheet: choose one method, write today's items, act, and review.

How to use this board

- 1. Start with clarity.** Write the single most important outcome of the day. Do not begin with random messages or social media.
- 2. Sort the work.** Use the Eisenhower Matrix to separate important work from noise.
- 3. Work in blocks.** Use Pomodoro for focus, 3/3/3 for a balanced day, and Time Blocking for a visible timetable.
- 4. Keep a streak.** Mark one daily habit or project action on the calendar. Never miss two days in a row.
- 5. Capture ideas.** Put notes into Projects, Areas, Resources, or Archive so they do not remain scattered.
- 6. Review briefly.** At night, tick completed work, move unfinished work, and prepare tomorrow's first task.

Six methods at a glance

Method	Best use	Daily action
Pomodoro	Starting a task when the mind is scattered.	25 minutes focused work + 5 minutes break. Repeat four times.
3/3/3 Method	Creating a balanced day without overplanning.	3 hours deep project, 3 urgent tasks, 3 maintenance tasks.
Eisenhower Matrix	Deciding what deserves attention first.	Do, schedule, delegate, or eliminate.
Eat the Frog	Ending procrastination on the hardest task.	Do the most difficult meaningful task first.
Seinfeld Strategy	Building consistency in writing, study, exercise, or research.	Mark a visible calendar every day you complete the habit.
Time Blocking	Protecting focus from interruptions.	Assign a fixed time slot to each major activity.

Daily decision rule

If a task is **important and urgent**, do it now. If it is **important but not urgent**, schedule it. If it is **urgent but not important**, delegate or shorten it. If it is neither, remove it.

Keep this page visible. Use pencil. Review once at the end of the day.

Daily Execution Template

Print this page daily or pin one laminated copy and write with marker.

1. Main outcome and frog task

Main outcome:

Why it matters:

Hardest meaningful task first:

Start time: _____ Finish: _____

2. Pomodoro work log

Round	Task	Done
1		☐
2		☐
3		☐
4		☐

3. 3/3/3 balanced day

3 hours - important project

3 shorter urgent tasks

- ☐ _____
- ☐ _____
- ☐ _____

3 maintenance tasks

- ☐ _____
- ☐ _____
- ☐ _____

4. Time blocking

Time	Block	Done
6-8		☐
8-10		☐
10-12		☐
12-2		☐
2-4		☐
4-6		☐
6-9		☐

5. Distraction control

- ☐ Phone away or on silent
- ☐ Notifications off
- ☐ Desk cleared
- ☐ Water and materials ready
- ☐ One tab / one notebook only

6. End-of-day review

Completed:

Postponed:

Tomorrow's first task:

Improve tomorrow:

7. Daily score

- Main outcome attempted ☐
- Frog task started ☐
- Two focus blocks completed ☐
- Distractions reduced ☐
- Tomorrow planned ☐

Eisenhower Matrix Template

Use this before starting the day, before meetings, or when too many tasks feel equally important.

Blank matrix for today's tasks

	Urgent	Not Urgent
Important	DO NOW 	SCHEDULE
Not Important	DELEGATE 	DELETE / REDUCE

How to fill it

1. Write every pending task quickly without judging it.
2. Ask: **Will this matter after one week or one month?** If yes, it is probably important.
3. Ask: **Will there be a real cost if I delay it today?** If yes, it is urgent.
4. Put each task into one box. Do not put everything in *Do Now*.
5. Start only with the top-left box, then schedule the top-right box.

Examples

Do now	Deadline today, important official reply, urgent health or family matter.
Schedule	Research writing, lecture preparation, exercise, financial planning, skill learning.
Delegate / ask help	Routine paperwork, formatting, repeated admin work, task someone else can handle.
Delete / reduce	Random scrolling, unnecessary perfection, low-value meetings, repeated checking.

Notice-board reminder

A task is not important just because it is loud. A task is important when it protects health, family, career, learning, responsibility, or long-term peace.

Focus and Work Compression

A practical version of “finish more in less time” without rushing or lowering quality.

Block out your day

Focus on one category of work during one dedicated block. Group similar activities together so the mind does not repeatedly switch context.

Block	Purpose
Deep work	Thinking, writing, solving, preparing, designing.
Admin	Email, forms, bills, official replies, routine coordination.
People	Meetings, calls, mentoring, discussion.
Personal	Food, health, family, rest, commute.
Review	Plan tomorrow and close open loops.

Parkinson's Law: set artificial deadlines

Work often expands to fill the time available. Give each task a smaller, believable deadline: **first draft in 40 minutes, reply batch in 20 minutes, outline in 15 minutes.**

Find your work style

Choose a style for the day instead of forcing one routine every day.

Planner	Writes blocks hour by hour and follows a visible schedule.
Prioritizer	Uses a short to-do list and finishes the most important item first.
Arranger	Groups similar work and keeps the day flexible.
Visualizer	Uses diagrams, boards, sticky notes, and checklists.

Compression checklist

- ☐ I know the exact output required.
- ☐ I have removed extra tabs, apps, and noise.
- ☐ I have set a small deadline.
- ☐ I will stop polishing after the useful version is ready.
- ☐ I will review quality once, not repeatedly.

Important note

No productivity method works if attention is continuously broken. Protect attention first; then choose a method.

Consistency and Six-Month Reset

For long-term goals: writing, research, fitness, reading, business, exam preparation, or skill-building.

Anti-vision to vision

Anti-vision: a clear picture of the life, habits, and outcomes you do not want. It creates urgency by showing the cost of drifting.

Vision: the opposite direction - the meaningful life and work you are building.

I do not want

Therefore I will build

Disappear for six months

This does not mean cutting responsibility. It means reducing low-value visibility and giving serious time to the system that supports your goal.

- ☐ Reduce social media and unnecessary comparison.
- ☐ Keep one primary project visible.
- ☐ Build a daily routine around fundamentals.
- ☐ Avoid explaining every step to everyone.
- ☐ Let visible progress speak after months.

Seinfeld Strategy: don't break the chain

Goal: _____

Minimum daily action: _____

1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

Rule: Mark the box when the minimum daily action is done. Never miss two days in a row.

Master the fundamentals

Progress usually comes from repeated basic actions: reading daily, writing daily, exercising consistently, solving problems, practicing communication, tracking money, and keeping commitments. Fundamentals look boring, but they compound.

Organize Ideas with P.A.R.A.

A simple template for turning scattered notes into usable knowledge.

The P.A.R.A. flow

Projects	Short-term work with an outcome and deadline. Example: prepare a lecture, finish a chapter, submit a form.
Areas	Ongoing responsibilities to maintain. Example: health, finances, teaching, family, department work.
Resources	Useful material organized by topic. Example: articles, methods, diagrams, references, templates.
Archive	Completed or inactive material kept for future reference.

Basic principle

Do not only store information. Capture it, organize it, distill it, and express it in useful work. A second brain is valuable only when it improves decisions, learning, writing, teaching, or execution.

Weekly idea review template

Inbox notes

Move to Project

Move to Area

Move to Resource

Archive/Delete

Practical tips

- ☐ Keep one capture place for quick ideas.
- ☐ Review once a week, not every hour.
- ☐ Name folders by action, not vague emotion.
- ☐ Move completed projects to Archive.
- ☐ Convert useful notes into outputs: article, class note, diagram, email, checklist, or decision.

Flow State Template

Use flow for meaningful work, not for distraction. Flow needs purpose, skill, challenge, and protected attention.

Flow state map

Before entering flow

- ☐ Choose a task that matters.
- ☐ Define the visible output.
- ☐ Make the task slightly challenging, not impossible.
- ☐ Remove interruptions for at least 45–90 minutes.
- ☐ Keep feedback visible: word count, solved problems, pages read, draft completed.

Flow worksheet

Something I care about _____

Long-term purpose _____

Skill I can use _____

Challenge level Easy ☐ Medium ☐ Hard ☐ Too hard ☐

First visible output _____

Protected time block _____

Signs of a good flow block

Clarity	You know exactly what must be produced.
Focus	Attention stays with one meaningful task.
Challenge	The task stretches ability without causing panic.
Feedback	You can see progress while working.
Fulfilment	The work connects with a larger personal or professional purpose.

Communication and Sales Excellence

A notice-board checklist for presenting a product, book, course, idea, or proposal.

1. Value proposition

What problem does this solve, for whom, and why is it different?

- ☐ Problem: _____
- ☐ Audience: _____
- ☐ Unique value: _____

2. Benefits before features

A feature says what it has. A benefit says how it improves the user's life or work.

Feature

Benefit

3. Keep the message simple

- ☐ One clear sentence.
- ☐ No unnecessary technical detail.
- ☐ No mixed promises.
- ☐ The listener can repeat the idea after hearing it once.

4. Tell a compelling story

A strong story shows the problem, struggle, turning point, and useful result.

Before

Problem

Turning point

Result

Proof

5. Know the audience

- ☐ What do they already believe?
- ☐ What pain or need do they have?
- ☐ What language do they understand?
- ☐ What objection will they raise?
- ☐ What next step should they take?

6. Improve after rejection

Rejection is data. Note the objection, improve the message, and try again with a clearer offer, better evidence, or a more suitable audience.
