

Francisco M. Fernández - Selected Papers

[A most misunderstood conditionally-solvable quantum-mechanical model](#)

[On the permutation symmetry of atomic and molecular wavefunctions](#)

[Weakly \(and not so weakly\) bound states of a relativistic particle in one dimension](#)

[On a model for rotational tunneling with a C6-space-time symmetric analog](#)

[High order analysis of the limit cycle amplitudes and frequencies in the van der Pol oscillator](#)

[A quantum-mechanical anharmonic oscillator with a most interesting spectrum](#)

[A simple model for Crystal Field Theory](#)

[On two different kinds of resonances for a simple model of rotational tunneling](#)

[Accurate eigenvalues of the Schrödinger equation with the potential \$V\(r\)=V_0 r^{\alpha}\$](#)

[Weakly bound states in heterogeneous waveguides](#)

[Highly accurate calculation of the real and complex eigenvalues of one-dimensional anharmonic oscillators](#)

[Generalization of parity-time and partial parity-time symmetry](#)

[Comment on: "On the Dirac oscillator subject to a Coulomb-type central potential induced by the Lorentz symmetry violation"](#)

[Comment on: "Bound states for a Coulomb-type potential induced by the interaction between a moving electric quadrupole moment and a magnetic field". Ann. Phys. 341 \(2014\) 86](#)

[Comment on: "Aharonov-Bohm effect for bound states from the interaction of the magnetic quadrupole moment of a neutral particle with axial fields". Phys. Rev. A 101, 032102 \(2020\)](#)

[Comment on: "The asymptotic iteration method revisited" \[J. Math. Phys. 61, 033501 \(2020\)\]](#)

[Comment on: "Neutron star under homotopy perturbation method" Ann. Phys. 409 \(2019\) 167918](#)

[Comment on: "Relativistic quantum dynamics of a charged particle in cosmic string spacetime in the presence of magnetic field and scalar potential". Eur. Phys. J. C \(2012\) 72:2051](#)

[Comment on: "Harmonic oscillator in an environment with a pointlike defect". Phys. Scr. 94 \(2019\) 125301](#)

[Comment on: Tunneling of coupled methyl quantum rotors in 4-methylpyridine](#)
