Reading notes. Alternating pale-blue and white bands apply to complete profile-year groups. A starred date is the first arXiv submission date, so its starred bracket is a preprint-to-publication interval, not publisher turnaround. Durations use days only below 30 days, months below one year, and years from one year onward. A dash means that a publication date was not identified.

Data note. Only records with an identified arXiv entry are retained. Profile records without an arXiv match were excluded at the user’s direction because they do not belong to this researcher.

Data snapshot. Public Google Scholar profile, Crossref publication metadata, and arXiv records, checked 21 July 2026. Scholar metrics are dynamic and may change after this snapshot.
