Reading notes. Alternating pale-blue and white bands apply to complete profile-year groups. Author position is the researcher's place in the abbreviated author list (position/total). Received or submitted dates were not recorded on the available publisher records, so the corresponding column is dashed throughout. Publication years and author order follow the displayed Google Scholar record; therefore a profile year can differ from the later journal publication year. Two records in the profile carry no year and appear at the foot of the table.

Data snapshot. Public Google Scholar profile and linked publisher records, checked 20 August 2026. Scholar metrics are dynamic and may change after this snapshot.
