

Dr. Yetendra Prasad Jha

Research publication portfolio

Position	Plasma Science and Technology Laboratory, Department of Physics, Indian Institute of Technology Delhi, India
Research areas	plasma material interaction; plasma sheaths; secondary electron emission
Scholar metrics	30 citations; h-index 4; i10-index 0
Coverage	7 works listed on the public profile, 2022–2025
Profile	Google Scholar record

Year-wise publication matrix

Rows are shaded by complete year blocks. Position is the researcher’s place in the abbreviated author list (position/total).

Year	Pos.	Authors (abbrev.)	Paper title	Cited	Journal / publication
2025	1/1	Y. P. Jha	Bohm Sheath Criterion for a Warm Plasma with Two Positive Ion Species, Non-Extensive Electrons, and Emitted Beam Electrons	–	Indian Journal of Contemporary Science
2024	2/3	H. K. Malik; Y. P. Jha; M. Kumar	Modified Bohm criterion and sheath characteristics in nonextensive electronegative collisional warm plasma with electron emitting surfaces	5	IEEE Transactions on Plasma Science 52 (6), 2117–2129
2023	1/3	Y. P. Jha; M. Kumar; H. K. Malik	Effect of collisions, ionisation and non-extensivity on sheath formation in an electronegative warm plasma under electron emission from the wall	3	Journal of Theoretical and Applied Physics 17 (2)
2023	1/3	Y. P. Jha; M. Kumar; H. K. Malik	Bohm sheath criterion for electronegative warm plasma carrying secondary electron emission in an oblique magnetic field	3	Journal of Theoretical and Applied Physics 17 (3)
2023	1/3	Y. P. Jha; M. Kumar; H. K. Malik	Bohm sheath criterion associated with magnetized collisional warm plasma containing secondary electrons and negative ions	5	Journal of Physics: Conference Series 2484 (1), 012001
2023	1/3	Y. P. Jha; M. Kumar; H. K. Malik	Effect of Q-nonextensively distributed plasma electrons on double sheath characteristics and virtual cathode formation associated with electron emitting surfaces	5	IEEE Transactions on Plasma Science 51 (3), 737–746
2022	1/4	Y. P. Jha; M. Malik; M. Kumar; H. K. Malik	Electronegative warm plasma and material interaction under secondary electron emission	9	Materials Today: Proceedings 65, 3483–3487

Reading notes. Alternating pale-blue and white bands apply to complete profile-year groups. Author position is the researcher’s place in the abbreviated author list (position/total); all seven author lists are shown in full by the profile, so every position here is exact.

Position. The profile states no affiliation of its own — it shows “Unknown affiliation” and verifies only an email address at physics.iitd.ac.in — so the header records the institution the entries themselves give. The Plasma Science and Technology Laboratory, Department of Physics, Indian Institute of Technology Delhi is the affiliation on the 2022–2024 papers; no source found states a title for him, or an affiliation, after mid-2024.

Columns. This profile has no arXiv preprints and the publisher records carry no received or submitted dates, so no preprint column is included; the table shows only what the profile verifies. Titles are reproduced from the profile with capitalization normalised, including the venue of the 2025 entry, which the profile renders in small capitals. The spelling “seconadary” in the 2023 oblique-magnetic-field paper is reproduced as the profile lists it. Citation counts are as displayed on the profile and are dashed where it shows none.

Data snapshot. Public Google Scholar profile, checked 27 September 2026. Scholar metrics are dynamic and may change after this snapshot.
